

Sermon Sequence  
for  
2/3 Weeks  
Revival

- The notion that evangelistic sermons must be arranged in a logical order is noted by most successful evangelists to be archaic.
- The mind which the sermon must impress and the Holy Spirit must convict does not work logically. Much better results are obtained if the sermons are sequenced in a psychological order.

The psychological order using the **Munroe Motivational Sequence** (Attention, Need, Satisfaction, Visualization, Action) or the **Jesus Evangelistic Sequence** (Attention, Interest, Conviction, Desire, Decision or Action) helps in two important ways:

- It keeps interest high throughout the series.
- It makes decisions easier to obtain.

## Topics should be arranged in three major blocks:

- Salvation through Christ
- What Christ wants you to believe and do
- Decision to become a member of Christ's last day church

# IMPORTANT

- All major doctrines should be preached or answered from the question box before the subject of baptism is presented.
- Every major doctrine should receive more than one treatment. Use the Question Box.
- The subject of baptism must be preached at least one and a half week before the first scheduled baptism.

## THREE WEEK CRUSADE SEQUENCE

	WEEK ONE	WEEK TWO	WEEK THREE
